When pairing the remote with control panel,
 1) Turn on the power of control panel,
 2) The green led light will flash on control panel,
 3) Press these 2 buttons at the same time ,
 4) When pairing is successful, the green light will flash faster,
 5) After pairing is successful there is no need to pair in future,
 6) If pairing is not successful, press the "reset" button (small inset button in the upper left hand corner of the controller) and repeat the above steps.
